

Your GDPR compliance solution

Provacy is a **complete solution for managing Personal Data Protection**, facilitating your compliance with the General Data Protection Regulation (GDPR).

1 Safe and intuitive

A **simple web browser** is all you need; we take care of the rest. No technical hassle, we host your application in a **partitioned and secure environment**. The security of your data is enhanced by **hourly backups** and the implementation of **backup servers for maximum protection** (data hosted in France and Germany). With our **guidance**, you'll know exactly where you stand with your Compliance: **dashboards** for an overview, **dynamic and interactive graphs**, numerous visual indicators (risk levels, completeness...), tracking mechanisms, and alert emails. Benefit from numerous **ready-to-use components** for an intuitive and visual assembly of your data: model sheets, drag-and-drop, sliders, form editor.

2 Flexible and adaptive

Our solution is **designed to adapt** to all situations. Do you want to rely on a **large network** of contacts? Or rather **maintain control** and work in a small committee? Provide the possibility for third parties to **interact** easily? Are you working for a local authority, a university, an association, an SME, or a large multinational and need to maintain your Register in Polish for one of your subsidiaries? Whatever your context or approach, we carry out precise expertise for a **tailor-made application**.

Interconnected 3 and open

With Provacy, you have a **collaborative platform** to **engage your teams** so that **compliance becomes everyone's responsibility**. Our **open solution** transcends the usual limits of user accounts (self-registration option) and provides you with **contact interfaces to freely collect data** from anyone with an email address. These **data exchange capabilities** are **automatable**, with the application **integrating and participating in your Information System**. SOAP and REST API interfaces, SSO (Single Sign-On) connections.

Attentive and evolutionary 4

You're not alone when it comes to the Regulation; our **responsive, caring, and supportive team** accompanies you every day. To start off on the right foot and increase efficiency, ideally at the project launch, we provide **training for your teams**. Contextual **assistance** is freely available from the interface. We are **listening** to your feedback to continuously improve our application according to your needs. Open to any request for **specific development**, we invite you to join the **user club** to build together the **application that suits you best**.

Top-notch and highly competitive 5

Top-notch quality combined with a policy of **affordability**. Provacy is provided on an annual subscription basis at prices significantly lower than those practiced by the competition. After considering all these arguments, you're convinced and have only one dream: to join us! BUT you already have a tool or you simply work with Excel, no worries, you won't start from scratch! We **import all your data into your new Provacy Register**. You objectively have every reason to choose us 😊

Join us, just like :

The solution

- ✓ **Collaborative Work:** Workflow Stages - drafting, validation, publication to the register - versioning and history - notification or follow-up emails.
- ✓ **Easy User Management:** Self-registration option, SSO directory
- ✓ **Light Interface** for Occasional Users
- ✓ **Dashboard and Dynamic Charts:** Track compliance of your entities or units
